

BEST PRACTISE

Using scavenger hunt app in (language) teaching

DEVELOPER: Anne Margrethe Sloth, TEC

EQUIPMENT:

Smart phone

LICENSES:

Depending on the app used. Mapop.dk is no longer available for new users.

LINKS:

[14 Fun Scavenger Hunt Apps for Team Building in 2023](#)

Seppo-game example: [Ulrike Eichstädt, Goethe-Institut Finland — Seppo](#)

TYPE:

Interactive scavenger hunt

TARGET GROUPS:

Teachers interested in enriching their teaching, language teachers

DESCRIPTION:

The teacher can make a route (through any given city or landscape) and place virtual posts that will open on the students' phones when they're physically located at the marked spot.

The assignments can be answered in many different ways, e.g. written, video, multiple choice and more.

WHY I RECOMMEND THIS BEST PRACTISE:

Event though we in Denmark have return to the ordinary classroom I have and will be continuing to use these three best practices as they've proven themselves not only to work as a second-best solution to 'real teaching' but to be great tools that gives a broader diversity in the way that I teach. I have used it many times in different subjects and have reached the conclusion that it gives the best outcome, when there's a connection between the physical location and the questions. E.g., at a 1700-century walk through Copenhagen or different places in a romantic garden when we work with 1800-century literature.

Map-op instructions (in danish)

SÅ LET KOMMER DU IGANG MED LÆRING I BEVÆGELSE

Mapop gør det let for undervisere at lave, gennemføre og evaluere læringsforløb for elever i alle aldre.

Opret bruger

På mapop.dk opretter du en bruger – enten med dit UNI*login eller med mapop-login.

Hent appen

Eleverne henter den gratis mapop-app til iOS eller Android

Giv eleverne rutenummer

Du giver eleverne det rutenummer, som du har fået på din oprettede rute.

Læring i bevægelse

Så er det igang. Eleverne gennemfører ruten – uden behov for WiFi.

Retur på skolen

Når eleverne kommer retur til skolen, uploades deres besvarelser.

Se besvarelse

Du kan se elevernes besvarelser på dit mapop – på den måde kan du evaluere på deres læring.
